

Inquiries II: Thermochemistry

Spring Term

This semester we will be continuing our study of the Chemistry in our kitchen. To go along with our food cart project, we will figure out how to calculate the calorie content of foods and where that energy comes from.

Your grade for the class will consist of 6 parts: Assignments, Mini Quizzes, Labs, Final Exam, Confluence and EDCRO reviews. See "Grading" below for a more detailed explanation.

An up-to-date class calendar can be found on the class website.

Grading:

Classwork 65%

Confluence 20%

EDCRO 15%

Class Structure

Assignments:

All assignments (including labs, quizzes, the final exam, and anything related to confluence) given this term will be given two grades; one for the content covered on the assignment and the other will be a community grade.

To get a 4 on the "How my work matters to me" community grade, you must turn your completed, neat assignment in on time. If you turn it in one class period late, you will get a 3. If it is received within two weeks of the due date, you will receive a 2. After that you will earn a 1. If you are absent on the day something is due, you will be given one extra class to get it in.

Mini Quizzes:

20 minute mini quizzes will be given on the first class day of every week (Monday or Tuesday depending on your schedule). You are not required to take notes during class, but if you do, you can use them on the mini quiz!

Labs:

All labs will be done in class. If you miss a lab, you must complete the lab makeup available on the class website by the next class.

Final Exam:

This will be a cumulative exam over all second semester topics. You may **NOT** use your notes but you can have a 3"x5" notecard filled out on both sides.
