

What do you do with a sick chemist?

In order to solve the riddle, answer the questions below. Match the answer to its corresponding word, and then place the word below to piece together the answer.

1. What element has 1 proton?
2. What element has the symbol "W"?
3. How many protons does Oxygen have?
4. What is the symbol for Sodium?
5. How many neutrons does Fluorine have?
6. Which element has an atomic mass of ~184?
7. How many electrons does Oxygen have?
8. How many neutrons does Aluminum have?
9. What is the symbol for the element with 14 protons?
10. Which element has 26 electrons?
11. What is the symbol of the element that has 20 neutrons?
12. Which element has an atomic mass of ~27?
13. How many neutrons does the atom with the symbol Br have?

Silicon - Then	Nitrogen - Can	Ca - Have	Tungsten - You	Aluminum - To
17 - Never	Hydrogen - If	45 - Barium	Zn - Treat	10 - And
Na - Helium	S - Medicine	Tin - Hospital	14 - Curium	K - Sick
37 - Potassium	Iron - You'll	8 - Can't	Hg - Boron	29 - Won't
